From manual to modern: Onboarding reinvented with Axuall Confirm

Onboard clinicians in days, not weeks

Despite the advances in technology, most health systems still rely on outdated, manual credentialing processes that slow down onboarding, frustrate clinicians, and delay revenue. **Axuall Confirm changes that.**

Part of the Axuall Network, Confirm equips credentialing, recruiting, and medical staff services teams with verified, up-to-date provider data—so they can act faster, with confidence.

Real-Time Verified Data

Instantly access credentials, work history, licensure, DEA, NPI, and case logs from 19,000+ primary sources.

Integrated, and Pre-Populated Forms

Auto-fill credentialing and onboarding forms using structured, verified data.

Continuous Monitoring

Ensure your provider data remains accurate and up to date across their tenure.

Seamless Workflows

Integrates with leading systems, including **Salesforce**, **Healthstream** applications and **sympplr** applications to reduce friction.

axuall

Proven results with leading health systems

Trusted by organizations like Hartford HealthCare, MedStar Health, and Mercy to:

Cut onboarding time by 70%

Eliminate manual PSV outreach. Reduce credentialing backlogs and get clinicians seated weeks sooner.

Improve clinician and staff experience

Provide a streamlined onboarding journey with fewer repetitive requests, fewer delays, and more transparency.

Increase revenue capture

With each week of delay costing up to \$38,000 in lost revenue per physician (AMN Merritt Hawkins), delays can quickly erode potential revenue. Confirm reduces those delays, helping systems protect margins and patient access.

Support scalable, AI-driven transformation

Mercy, a health system with 50+ hospitals, is transforming physician onboarding by streamlining data collection with Axuall.

Results

Mercy is achieving faster, more efficient onboarding—**transforming a 140-day process into 90 days.**

"We are getting the data much faster than we ever did. It's much more accurate. We're spending less time scrubbing and reworking the data, and we're now able to parlay that into completely revamping our onboarding process."

Dr. Chad Smith, physician executive and former CMO, Mercy Hospital Oklahoma City

Why it matters

Health systems are under pressure to do more with less—fewer recruiters, tighter margins, and growing clinician shortages. Outdated onboarding processes only make it harder.

Axuall Confirm modernizes credentialing by delivering verified provider data in real time, reducing administrative load, accelerating timelines, and enabling teams to focus on what matters most: getting clinicians to the bedside, faster.
