

The Wait for Clinician Engagement and Verifications is Over!

Axuall's Clinician Data Network Connects Your People, Systems, and Processes to the Information You Need

Axuall's Data Network Helps Optimize Your Workforce, Informing Your Decisions and Streamlining Clinician Deployment

Developed with and backed by some of the world's leading healthcare organizations, Axuall is a workforce intelligence platform built on a national real-time Clinician Data Network. We connect healthcare organizations to vast data, providing insights and actionable data on your **physician, advanced practice provider, specialist, and nursing population** while streamlining your clinician onboarding and deployment via digital credentials that plug into your systems.

Engage Clinicians and Onboard Them Faster

Axuall reduces the barriers, time, and burden for clinicians to apply for roles and privileges while providing administrative teams they use with real-time data to eliminate information delays in credentialing, privileging, enrollment, and onboarding.

Plug Into Software Your Teams Use Today

Axuall is natively integrated into leading provider management platforms to allow your teams to continue to use the software they are familiar with while staying compliant with bylaws and industry standards.

Empower Your MSPs

Medical Staff Professionals (MSPs) and administrators consistently list excessive wait times for receiving complete and accurate privilege and enrollment applications from overworked and busy clinicians as the top reasons for credentialing and onboarding delays. As MSPs often say, **"If I have all the information I need, I can do my job safely AND fast."**

Axuall connects your MSPs to real-time clinician information, auto-generated forms, signature pages, and a data network of over 6,800 authorized primary sources.

Product Specifications and Results

Connectors to a Vast Network of Data

Axual provides real-time, continuously updated, national provider information network that connects healthcare organizations directly to over **6,800 primary source verifiers (PSVs)**, data partners, and practitioners (via the Axual Digital CV and Credential Wallet). Designed to be fault-tolerant, highly auditable, tamperproof, and standards-compliant, the Axual Network serves as the connective nerve system to the provider data.

- Flexibility for any forms

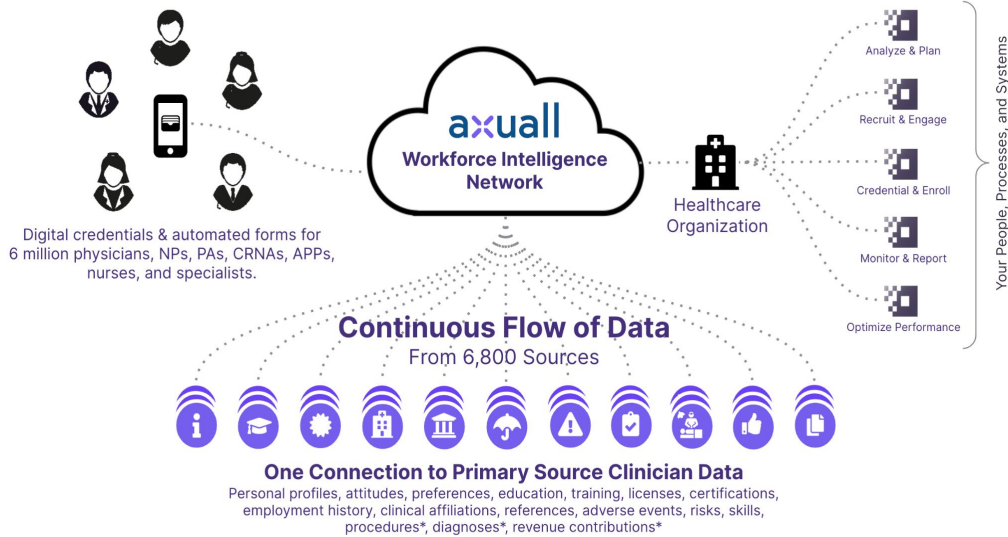

Decision Support & Integration

Administrative Center: An Administrator-facing portal that enables primary source querying, form routing, data acquisition monitoring, and reporting across all of your employed and affiliated clinicians simultaneously while providing continuous monitoring for your entire clinician population.

The Provider Browser (coming soon): Enables your decision makers to slice and dice your provider population, improving insight into your clinical workforce and the market around you.

Data Gateway and APIs: Leveraging our APIs and automated data feeds, your existing recruiting, provider management, scheduling, HR, and EHR systems can plug into Axual's Network, providing real-time continuous streams of information.

The Workforce Intelligence Network

A Case Study in Action MedStar Health

As part of its innovation transformation initiatives across its 10 hospitals and more than 300 care locations, MedStar Health integrated Axual's technology into its next-generation clinician credentialing, onboarding, and engagement process, yielding a **21-day reduction** or roughly a third of credential processing time while reporting a **clinician satisfaction score of 9 out of 10**.
